About Me

Computer Engineering undergraduate with strong programming fundamentals and hands-on experience building and debugging real-world software applications. Proficient in applying Object-Oriented Programming principles across academic and project work. Quick learner with proven ability to collaborate in team environments, follow structured development practices, and deliver clean, maintainable code under guidance.

Education

MIT Academy of Engineering, Pune <i>B.Tech. in Computer Engineering</i>	2022 – 2026 CGPA: 6.70 / 10
MDS Public School, Udaipur <i>CBSE 12th Grade</i>	2022 67%
Flower Kids Senior Secondary School, Sagwara <i>CBEA 10th Grade</i>	2020 88%

Skills

Languages: Python, JavaScript, SQL

Concepts: Object-Oriented Programming (OOP), Relational Databases, SDLC, Debugging, REST APIs

Technologies & Tools: Machine Learning, Deep Learning, YOLO, OpenCV, Pandas, NumPy, Git, HTML, CSS

Work Experience

SkillsCraft | Technology (Remote) **Jul 2025**

Web Developer Intern

- Developed and enhanced frontend application modules using **HTML**, **CSS**, and **JavaScript**, following clean code and maintainability standards.
- Debugged and resolved UI issues, improving application stability and user experience.
- Collaborated within a development team, participating in feature implementation under senior guidance and adhering to coding best practices.

Project Work

- **Weapon Detection System using YOLO:** Engineered a real-time object detection system applying structured, modular programming principles. Designed and debugged a custom-trained deep learning pipeline, iterating on model accuracy through systematic testing and troubleshooting. Implemented real-time video processing logic using OpenCV with a focus on performance and reliability.

Key Skills: Python, OpenCV, YOLO, Deep Learning, Debugging, Git

- **Safety and Productivity Management System for Coal Mines:** Designed and developed a data-driven application applying OOP concepts for modular system architecture. Built relational database workflows in SQL for attendance, task management, and incident tracking. Created dashboards for real-time operational monitoring, replacing manual processes with structured, maintainable software solutions.

Key Skills: Python, SQL, Database Design, OOP, SDLC, Team Coordination

- **DevPilot AI:** Built a full-stack SaaS application that automates software development tasks including code review, bug detection, and documentation generation using AI/LLM APIs. Applied software engineering best practices throughout the development lifecycle — from requirements and design through testing and deployment.

Key Skills: Python, LLM APIs, Full-Stack Development, SDLC, Debugging

Certificates

- **AWS Certified Cloud Practitioner (CLF-C02)**
